Conexus Receives K2 2009 New Technology Award

- Technology provider recognized by K2 Enterprises for market-leading compliance solution -

Louisville, Ky., Oct. 29, 2009 – [Conexus, LLC](#), a leading provider of integrated automation, compliance and monitoring software solutions, announced it has received the K2 2009 New Technology Award for its [CONEXXUS® patent-pending monitoring and process automation software platform](#) as part of [K2 Enterprises'](#) Annual Quality Awards. A premier provider of technology continuing professional education (CPE) in the United States and Canada, K2 Enterprises annually recognizes outstanding technology providers through these awards.

“We are proud to receive accolades from the K2 Team as part of their [K2 Annual Quality Awards](#) and to be in the company of the other prestigious award winners,” said Jeff Reibel, CEO of Conexus. “We strive to develop and provide easy-to-use technology with a result-driven focus on increased efficiency for our end-users and the alleviation of day-to-day business interruptions. Our end goal is that through technology adoption, businesses will save both time and money.”

CONEXXUS software brings an added element of transparency by allowing everyone involved in compliance processes to see in real time the progress and status of every project. It electronically gathers, stores and shares documents in any file format, auto-connecting documents to necessary controls. Using CONEXXUS software, organizations will streamline audit preparation efforts to easily identify and address items that need completion in order to remain compliant.

“Conexus’ patent-pending software addresses the continuous monitoring of financial compliance processes like none other in the market today. Conexus uniquely picks up where GL systems leave off, creating a bridge to a powerful solution for industry CPAs,” shares Val Steed of K2 Enterprises.

K2 Annual Quality Awards are determined by an opinion poll of K2 Enterprises’ instructor team. Votes are influenced by end-user feedback and the team’s experience from consulting and extensive teaching.

About K2 Enterprises

K2 Enterprises is the premier provider of technology continuing professional education (CPE) in both the United States and Canada. With seminars in over 46 states in 2009, 900+ presentations, special events such as their turn key Annual Technology Conferences, CPE & Ski, K2 Enterprises Canada, they are the largest provider of technology CPE in North America.

About Conexus

Conexus, LLC develops, markets and supports software and accompanying solutions offering increased visibility and decreased costs for clients. Conexus provides unique, integrated solutions, which monitor documents, sign-offs and processes for completion, or lack thereof, across an organization on a real-time basis. CONEXXUS'® customizable business rules and automated processes enable staff to complete processes quickly, accurately, and in compliance.

Conexus now offers REO Optimizer to financial institutions with distressed development properties, which is powered by a module of CONEXXUS'® patent pending monitoring and process automation software platform, a suite of modular software that also enables companies to go paperless, reduce operational costs, shorten cycle times, collaborate and monitor compliance on a real time basis to reduce the risks. For more information on how Conexus can help your organization, please visit us online at www.conexus.com.
